Find out more about ladybugs and other insects from the library's collection (Call number: JP 595.7).

Materials needed:

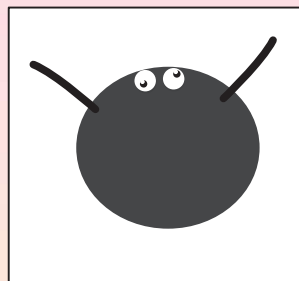

Two white paper plates, red and black paint, paintbrush, scissors, black construction paper, a black pipe cleaner, googly eyes, glue and a paper fastener.

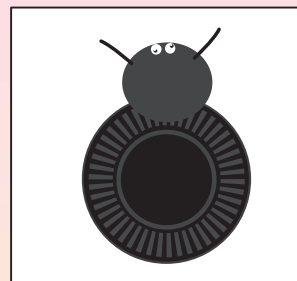

Paint one paper plate black and one paper plate red.

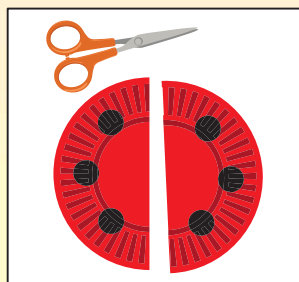

Once the red plate has dried, paint some black circles on it.

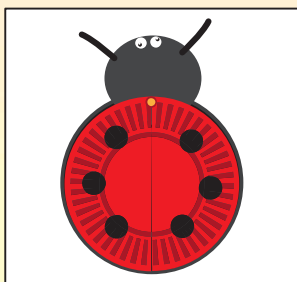

Cut out a circle from the black construction paper for the ladybug's head. Stick two googly eyes on its face and two short pipe cleaners on its head as antennae.

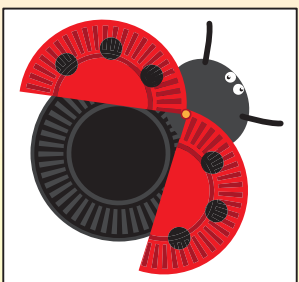

Glue the head to the black paper plate.

Cut the red plate in half. Make a hole on one end of each half of the red plate.

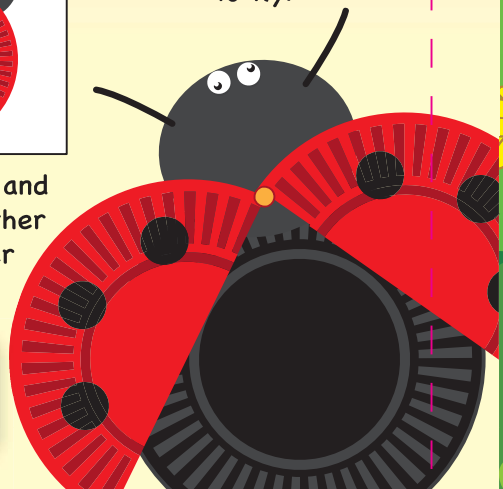

Make a hole through the ladybug's head and black plate.

Join the wings and the body together using a paper fastener.

Now you have a ladybug ready to fly!

Let's make a ladybug that can flap its wings!

- Activity for: The Grouchy Ladybug
- Call Number: JP CAR -[BA]

- Author: Eric Carle

A bad-tempered ladybug refuses to share the aphids on a leaf with a friendly ladybug, and challenges it to a fight. When the friendly ladybug agrees to the fight, the bad-tempered ladybug backs down.
